

## 2024 Geographical (GEO) Discount

Starting with papers submitted in 2024, when publishing in one of IEEE's fully Open Access publications discounts are now based on the location of all the paper's authors. Author Groups located in low-income countries are eligible for a 100% waiver on their open access fee. Author Groups located in lower-middle-income countries are eligible for a discount ranging from 25% to 50% on their open access fee. The classification is based on the World Bank's data. Please visit the Discount Program Page on IEEE Open for more details: <https://open.ieee.org/for-authors/ieee-low-and-lower-middle-income-country-open-access-discount-program/>.

Country Group A	Country Group B	Country Group C
<b>Low Income Countries (100% Waiver)</b>	<b>Lower-Middle-Income Countries (50% Discount)</b>	<b>Lower-Middle-Income Countries (25% Discount)</b>
