

2025 Geographical (GEO) Discount

IEEE's fully Open Access publications discounts are now based on the location of all the paper's authors. Author Groups located in low-income countries are eligible for a 100% waiver on their open access fee. Author Groups located in lower-middle-income countries are eligible for a discount ranging from 25% to 50% on their open access fee. The classification is based on the World Bank's data.

Please visit the Discount Program Page on IEEE Open for more details: <https://open.ieee.org/for-authors/ieee-low-and-lower-middle-income-country-open-access-discount-program/>.

Country Group A	Country Group B	Country Group C
